# COURSES 2011

## Advanced Neuroscience Courses in the heart of Tuscany

The Neuroscience School of Advanced Studies is home of residential, intensive courses, where leading investigators from around the world spend two full weeks together with a small, highly selected number of participants and discuss research challenges in the unique atmosphere of the fortified medieval village of San Quirico d'Orcia, all within the most idyllic Tuscan countryside.

Visit [www.nsas.it](http://www.nsas.it) to learn about each Course and the associated art, cultural and wine programs.

Neuroscience School of Advanced Studies

Palazzo Chigi Zondadari

Piazza Chigi 2, 53027 San Quirico d'Orcia, Siena, Italy
